WATERJET

Dynamic WATERJET CUT Components

Substantial Savings on
Traditionally Machined
Components with
Waterjet Quality
& Accuracy

- High Precision Cutting Tolerances
- Cut ANY Material up to 200mm Thick
- Reduce Cutting time by up to 70%
- High Repeatability
- No Heat Affected Zones (HAZ)
- Reduce Waste Materials
- Massively Reduced Set-up Costs
- Achieve a Burr Free Finish even with Intricate Designs

WATERJET

Why Choose WEC Waterjet?

Heavy investments in market leading dynamic Waterjet cutting technologies mean that we can offer machined tolerances & quality to the UK's highest standards.

The use of specialist 3D & computerised motion control software enables WEC Waterjet to produce highly complex shapes to an accuracy of 0.13mm.

We provide waterjet cutting services to a broad range of industries including: aerospace, automotive, construction, engineering, marine, and oil & gas.

Cut ANY Material up to 200mm!

Copper	Acrylic	Glass	Granite
Brass	Plastics	Fibreglass	Limestone
Bronze	Carpet	Carbon Fibre	Marble
Carbon Steel	Cork	Wood	Slate
Stainless Steel	Foamex	Leather	Ceramics
Iron	Rubber	Silicone	composites
